https://en.wikipedia.org/wiki/History_of_Gaza

About 3000 years ago in Palestine settled the pugnacious Sea Peoples:

the **Phoenicians**

who settled along the coast to the north
(between Beirut and Haifa - today Lebanon)

the **Philistines**

who settled along the south coast
(between Jaffa and the Sinai)

The **JEWS** founded
David's Kingdom (970 BC)
and Solomon's Kingdom (930 BC)

These peoples drive out or mingle with
the pre-existing population:

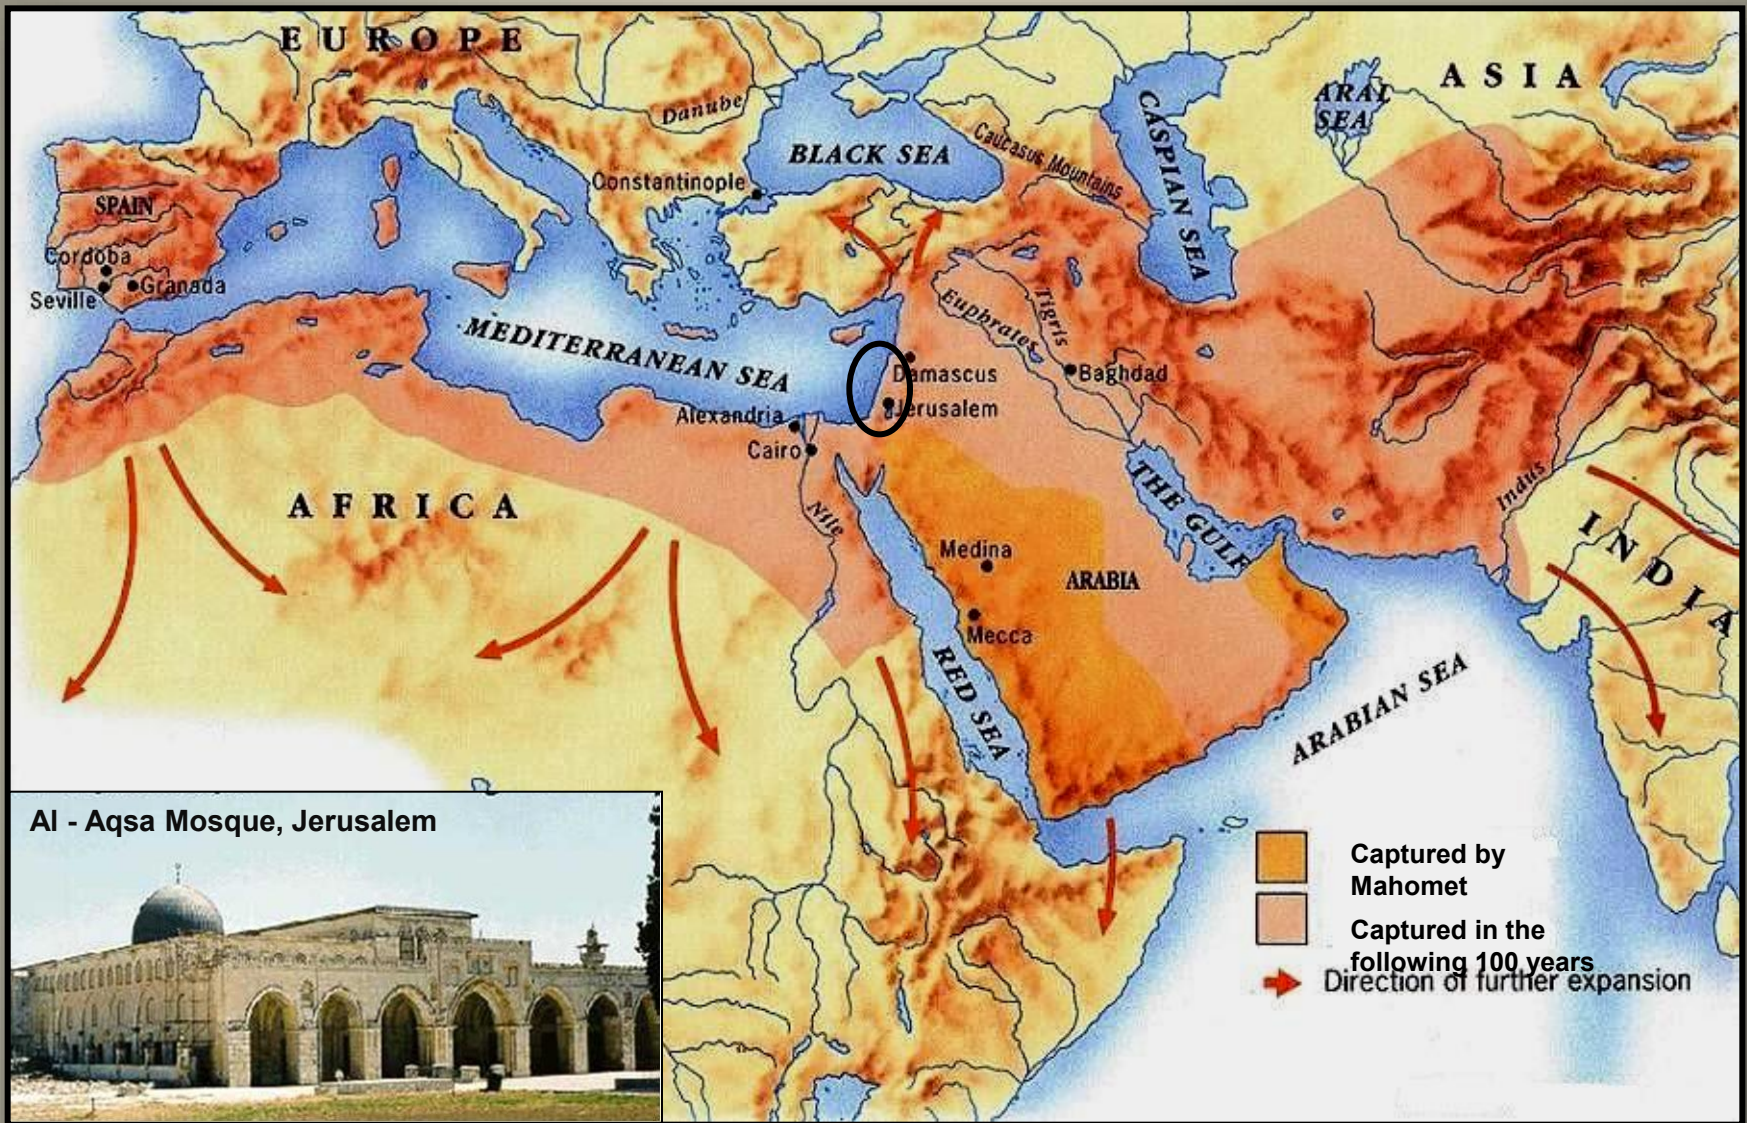

the **Canaanites**.

The Phoenicians and the Philistines are
able to maintain their independence.

The Great Mosque in Gaza was last destroyed by the Israelis in 2023

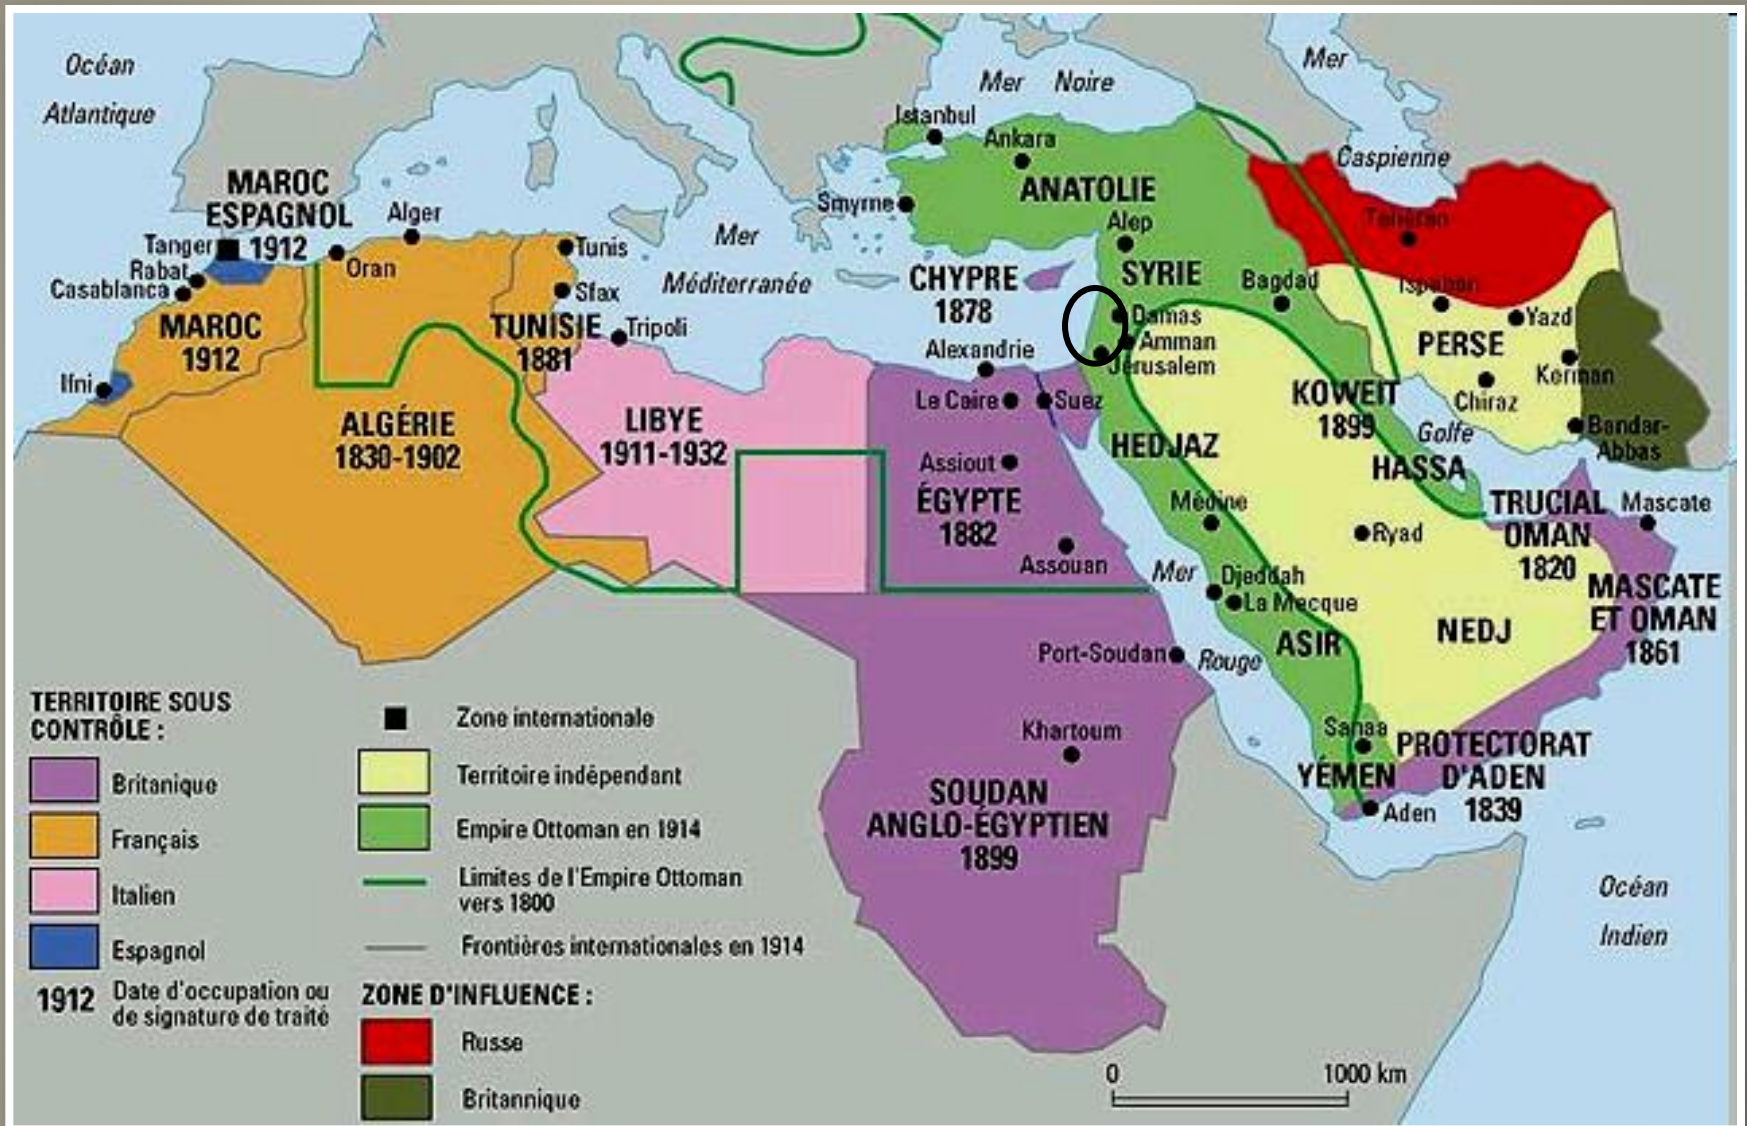

Located on Al-Wahda Street in downtown Gaza, this imposing stone building dates back to the Mamluk period (1300 - 1500). It is known as Qasr al-Basha because Napoleon spent a few nights here on his way through the town in 1799. This mosque, and many others, was destroyed in 2023 by the Israelis.

Gaza - The great Mosque

The great mosque of Gaza was built about 2000 years ago as a pagan temple. Around 400 it became a Christian church. In 637 it became a mosque and in 1100 again a Christian temple. In 1178 it became a mosque again. From 1228 to 1244 it was again transformed into a Christian church. The Mamluk period followed, during which the mosque was joined by a Christian church. In 1799 Napoleon passed through it and in 1994 Yasser Arafat declared it the first territory freed from the Israeli occupation.

Dear Lord Rothschild,

I have much pleasure in conveying to you, on behalf of His Majesty's Government, the following declaration of sympathy with Jewish Zionist aspirations which has been submitted to, and approved by, the Cabinet

"His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of this object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country"

I should be grateful if you would bring this declaration to the knowledge of the Zionist Federation.

“On **March 10, 1948**, eleven men held a meeting in the Red House, headed by Ben Gurion. The eleven decided to expel one million Palestinians from historical Palestine.” (Ilan Pappé)

The Zionists started planning the ethnic cleansing of Palestine in 1940. Plan D (Dalet) entered the implementation phase in March **1948**.

A detachment of Israeli soldiers with motorized support during an attack on a small village in the Negev area of Palestine on Jan. 6, 1949. Subsequently the survived Palestinians will be killed or driven out (most will take refuge in Gaza) and the village will be destroyed. The farm belonged to the Palestinian family Abuelaish who in May 1948 had to take refuge in the Gaza Strip. In 1972 the Israeli Land Administration assigned / leased the farm to Ariel Sharon. The current head of the family and its rightful owner, the Palestinian Izzeldin Abuelaish, is a doctor and is forced to live as refugees in Gaza where he can see his land usurped by the Zionists. During an Israeli bombardment three daughters of Mr Abuelaish were killed.

Due to the excessive exploitation of groundwater sea water enters the basement of the Gaza Strip.

The groundwater is heavily polluted also because sewage systems are damaged by Israeli bombing and electricity lack, neglect, and more. Until the last day of the colonies withdrawal in 2005, the Israelis buried in Gaza Strip a lot of toxic industrial waste. Now this waste contribute to the chemical water pollution.

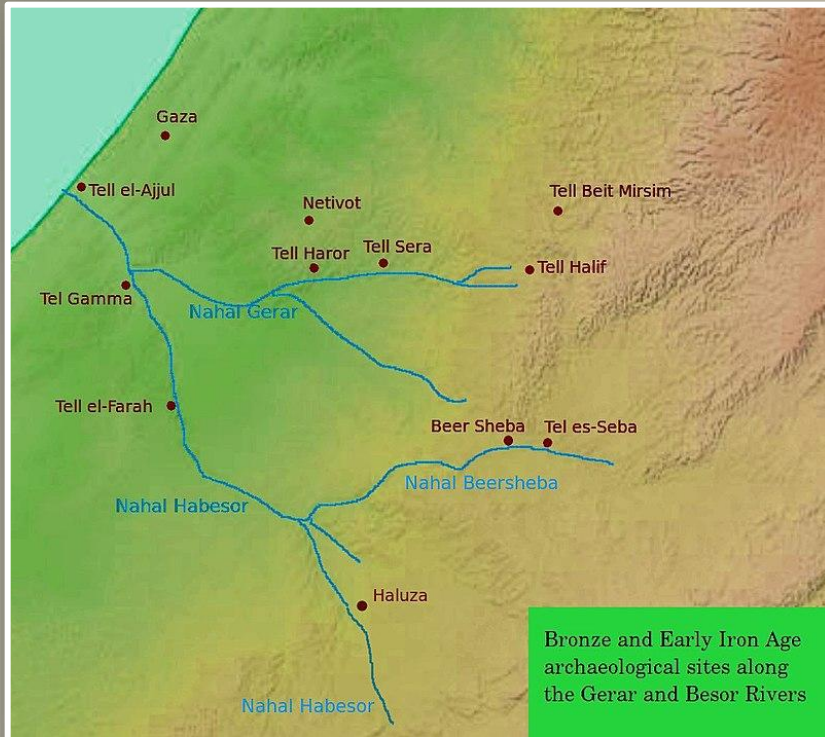

Gaza Strip - Water

Figure 1. Levels of chloride (denoting salinity) in the groundwater within the borders of Gaza, for the years 2000 and 2010, plus predicted data for 2020. (Data from the Palestinian Water Authority, Gaza). The internationally accepted guideline for chlorides in drinking water is 250 mg/litre.

Over 99% of Gaza's water is unfit for human consumption. One parameter of water quality is its level of chloride (salinity). These maps show the levels of chloride in Gaza's water in the years 2000 and 2010, plus predicted levels for 2020. Darker shades of green and red indicate higher levels of chloride. Green: drinking water.

The flooded areas: Wadi Ghazzah

The Wadi Ghazzah River is the longest in Palestine. It starts from Hebron, collects water from the Negev and flows into the Mediterranean in the Gaza Strip. The Israelis take all the water from it and then pour into the river the wastewater that arrives in the Strip. Sometimes the Israelis open the dams creating large floods in the Strip, moreover the Israelis deny the existence of these dams.

Resources in Gaza Strip

The Israelis are constantly changing the regulations and the size of the sea zone accessible to Gaza fishermen. Sometimes they completely prevent fishermen from going out to sea or arrest fishermen and confiscate boats and equipment. Because of the limitations the catch is poor. The damage to the fishermen is enormous.

The Israeli Dahiya doctrine

The Dahiya doctrine is a military strategy invented by the Israeli General Gadi Eizenkot, with whom during an asymmetrical conflict in an urban context the army deliberately hitting civilian infrastructure in order to create suffering to the civilian population with the intent to create deterrence.

The Dahiya doctrine (including the attacks in Gaza and all other measures against the Palestinians - military, legal, administrative, etc.) is the result of a growing of nationalism and radicalism in Israel. It follows that in Israel, as more you are strict with the Palestinians and more you are popular.

Officially the bombing was in retaliation to rocket fire from the Gaza Strip by Hamas, but in reality it was an operation for the election of the Kadima party leaders in power who also took advantage of the presidential void in the USA.

By bombing businesses in al-Rimal and elsewhere, Israel was inflicting damage on Gaza's economy that would be difficult to repair, the human rights group Al-Haq has suggested. Al-Haq noted that Gaza's economy was already on the brink of collapse before the May 2021 offensive began.

Israel destroyed or damaged an estimated 525 businesses in Gaza last month. "The greatest destruction was to shops," said Ali al-Hayek from the Federation of Palestinian Industries. "The losses to goods prepared for Eid al-Fitr were very heavy, especially in the al-Rimal neighborhood. This beautiful commercial neighborhood was turned into a pile of rubble."

The official unemployment rate in Gaza stood at 48 percent ahead of last month's attack. According to al-Hayek, it would not be surprising if the actual unemployment rate climbs to 70 percent because of the damage caused by Israel in May 2021.

At dawn on 7 October 2023, a large-scale operation began by the Ezzedine al-Qassam brigades , the military branch of the Hamas party, + other resistance groups, which from the Gaza Strip - attacked by surprise the territory of Israel by land, by sea and from the air, also with an unprecedented long-range rocket launch. Unfortunately the Palestinian militiamen have also committed serious acts against the civilian population and captured hostages. Israel immediately bombed the Gaza Strip and declared that it wants to eradicate Hamas.

October 13, 2023 Israel orders the evacuation of the northern part of the Gaza Strip: 1.2 million people have 24 hours to move to the south

Gazans must flee: they loosed anything. The procedure is a tragedy similar to the ethnic cleansing of 1948. The Gaza Strip becomes a unlivable desert covered by debris.

The Morag Corridor

Israel is seizing large parts of the Gaza strip and reshaping the palestinian territory. Considering that Israel has expanded the security zone along the border to 1 km and has also expanded the Netzarim corridor, it is clear that Israel wants to confine the Palestinians to small areas.

Year 2004 - 2021

In 17 years Israel performs a dozen military operations against Hamas in the Gaza Strip:

Operation Rainbow	12 - 24 may 2004
Operation Days of Penitence *	29 September - 16 October 2004
Operation First Rain	Summer 2006
Operation Autumn Clouds	November 2006
Operation Lighting Strike	
Operation Hot Winter	February 2008
Operation Cast Lead *	December 2008 - January 2009
Operation Pillar of Clouds *	14 - 21 November 2012
Operation Protective Edge *	8 July - 26 August 2014
Operation Gardian of the wall	June 2021
Operation breaking down	2022
Shield and Arrow	May 2023

NB: the list is incomplete. Also are not mentioned small military operations such the firing of rockets by Palestinian and targeted assassinations and violations by Israel. It is also evident a certain concomitantly of operations with the Israeli elections.

infrastructures in 2009 following Operation Cast Lead (2008-2009). Since similar methodologies were used in both 2009 and 2014, a comparison of the assessment results is possible. However, as the 2008-2009 conflict was assessed with lower resolution (2m) imagery, only the more severe damage was visible, and thus the comparison of the two resulting datasets utilized only the severely damaged and destroyed classes from 2009 and 2014.

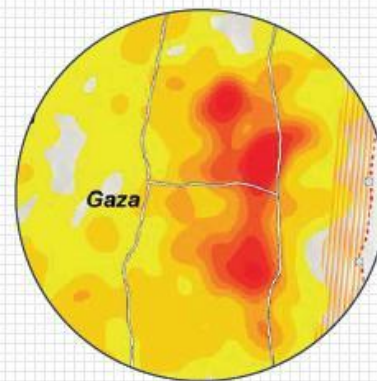

Comparison of the two time periods indicates that the 2014 conflict was much more destructive in terms of damage to buildings than the 2008-2009 conflict. The 2008-2009 conflict resulted in a total of 2,852 destroyed or severely damaged buildings detected by UNOSAT, while for 2014 the figure is 10,326. Even accounting for the possible error introduced by the reduced resolution imagery used to analyse the 2008-2009 conflict, this represents a relatively large increase in detected damage. Spatial distribution of the damage is also much more widespread from the 2014 conflict when compared to the 2008-2009 conflict. In 2014, damage occurs in almost every portion of the Gaza Strip.

Epicenters of damage do appear to differ significantly from 2008-2009 compared to 2014. For example in 2008-2009 the Rafah border area adjoining Egypt was a prime focus of military activity and thus saw a large amount of destruction. While this area also saw destruction in 2014 it is markedly less intense than 2008-2009. In addition, while Beit Hanoun, Shejaiya, and other areas were heavily targeted in 2014 these same areas were relatively lightly damaged in 2008-2009.

One of the highest densities of damage was found around the Gaza Governorate close to the border. Of the total 10,326 buildings found with visible damage on imagery in Gaza, 30 percent (or 3,090 damaged buildings in total) were found inside the Gaza Governorate alone with 1,983 destroyed buildings and an additional 1,127 severely damaged buildings.

**Ben Gurion's
program is always
current and the
Israelis apply it
ruthlessly.**

**We will drive out the Arabs
and take their place. The
Palestinian people will
have to be reduced to a
group of landless beggars
by fraying their social
network, eliminating their
leaders and destroying
their infrastructure.**

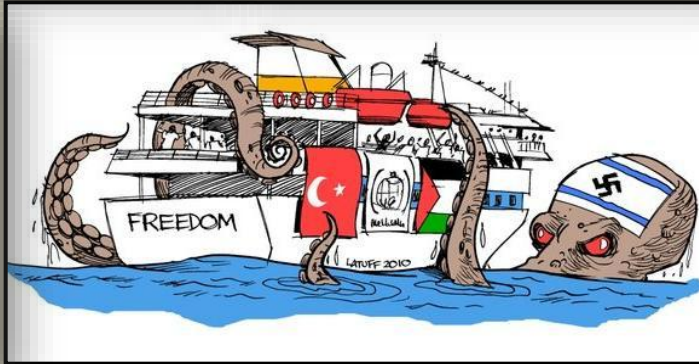

**In each attack a decisive
blow should be struck
resulting in the
destruction of homes
and the expulsion
of the population.**

October 2016 - Avigdor Lieberman, the Israeli defense minister, said menacingly that "the next war with Gaza will be the last."

Benny Gantz, general and deputy prime minister of israel: "We must bomb the Gaza Strip back to the stone age".

Break the siege of Gaza

On the afternoon of October 5, 2016, at 15:58, the Navy of the Israeli occupation forces have surrounded Zaytouna-Oliva as it was sailing in international waters and arrested 13 human rights activists who were going to Gaza and confiscated the boat and everything.

A longing for freedom

Hope never will die.

In 2020, the pandemic has further aggravated the situation in the Gaza Strip, also because the Israelis have limited the flow of medicines, masks and medical equipment as well as financial aid donated by Arab countries. The curtailment of UNRWA funding and the bombing of May 2021 and specially of 2023-2024, has also amplified the suffering of the population.
